NEW ARRIVAL

BR022 BAHARI LAND CRUISER 250 18 x 8.0J 6H139.7 +45

We make the Black Rhino Bahari for enthusiasts seeking a versatile monoblock wheel built for off-roading.

We design the Bahari for function and form, featuring a robust six-spoke design complemented by a deep hub area that protects the lug cavities and enhances the wheel's rugged look. The Bahari boasts spokes with chip-deflecting chamfers designed to shed debris and safeguard the wheel's finish even in the harshest off-road environments. Additionally, the Bahari features an enlarged valve stem access hole for effortless air pressure adjustments and a multi-contoured lip profile that cleverly localizes damage from rocks and debris to the lip, preserving the wheel's overall integrity.
